The Emerging Voices for Global Health Board

I am writing in response to the opening for Emerging Voices for Global Health (EV4GH) board members with a particular interest in the African Region that I saw through the EV4GH google group email system. I have earned a Ph.D. in Public Health and have accumulated more than five years' experience in the field of Health Policy and Systems Research and Global Health.

My excellent ability to engage with local and international stakeholders in the field of global health as well as my ability to groom younger and emerging minds have received praise from previous employers.

I have outstanding organizational skills and my extensive knowledge of the ethos of the EV4GH both as an attendant and as a facilitator puts me at a pole position of leadership in the organization. I have also, since becoming an emerging voice, been active in most activities and endeavors that the organization has organized such as reviewing abstracts for the selection of the current EV4GH 2020 batch, design of course, and facilitation of session. I am also involved in the organized session that EV4GH will be presenting at the second phase of the HSR Global symposium in 2021.

My well-documented leadership abilities and contributions to the organization thus far would make me an effective addition to the EV4GH governing board. I welcome any questions you may have after reviewing my resume. Thank you for taking the time to consider me for this position.

Kind regards,
